

The green line shows where the Kids will walk to where Micat will dock.

The red line shows where parents should come to deliver their children in the 'drop-off' zone.

Two (2) security guards will be on-site to ensure the students get from the 'drop-off' zone to the waiting area and remain there until the Micat docks.

Once the Micat Docks, Two (2) x Micat crew - dressed in high vis - will disembark and join the two security personnel and teachers to ensure all students are safely boarded. The walkway from the waiting area to the Micat is not alongside the road - it runs along the river - see Green line.

Once the charter is finished, the Micat staff and Security staff will disembark the vessel and ensure all students get from Micat to the designated waiting area safely, once again ensuring they all use the path that goes along the river.

Once all students are safely in the waiting zone, Micat staff will reboard the vessel, however the two security guards will remain until all students have been collected safely.
